Summary

High-Performing Full Stack Web Developer proficient in fundamental front-end languages. Exceptional at problem solving to address inconsistencies. Known among staff for quality work and attention to detail no matter the complexity of the project.

Technical Skills

Languages: HTML5, CSS3, JavaScript, jQuery, AJAX, Node.js, Express.js,

Applications: Git, Npm, Vs Code, PowerShell, SQL, DOM, Agile

Projects

Dinner Spinner | **GitHub:** <https://github.com/LeinadZz/Dinner-Spinner>

Deployed Application: <https://dinner-spinnerrr.herokuapp.com>

A food-focused online social networking service. The user can use the app to share recipes as well as view recipes from other Dinner Spinner users.

- Created a real-world full-stack application that stores user information, to display to other users and utilizes user authentication to keep track of all users.
- Node.js, Express.js, MySQL, Handlebars.js, Sequelize

Bottom's Up | **GitHub:** <https://github.com/LeinadZz/Bottoms-Up-API>

Deployed Application: <https://leinadzz.github.io/Bottoms-Up-API>

An app designed to help people search for breweries by their postal code. The user can use it to search for breweries and seek Google User rating information for each brewery searched.

- Connected two API's to work together seamlessly to bring our concept to life, while also testing the site for usability and fixing any bugs that occurred.
- HTML5, CSS3, JavaScript, BULMA, Visual Studio Code

Experience

Freight Team Member

2/2022 – Current

The Home Depot

Rohnert Park, CA

Built and Maintained working relationships with peers and upper management, while working hard to learn and acquire skills to maximize performance. Upheld high standards of productivity to exceed quality scores on a consistent basis..
